

Australian Standard AS 4020:2018

Testing of Products for use in contact with Drinking Water

POTABLE WATER COMPLIANCE

Construction Best Practices, Codes and Standards challenge us all in ensuring we all play our part in commissioning sound construction practices.

Any concrete structure that will have contact with drinking water requires certification to the current Australian Standard AS 4020:2018.

The Xypex product range is unique in that a wide range of our products have been tested and comply with the latest AS 4020:2018 Standard.

Commissioning construction Best Practice has matured within our industry and is now expected by us all. We at Xypex Australia continue to collaborate with industry professionals to ensure we deliver on our promise in complying to the latest Standards, Codes and Guidelines that deliver on supporting your proposed choice of solution for waterproofing, durability performance, protection, or remediation of concrete structures in all potable water applications.

Everyone doing their part to achieve Construction Best Practices that support compliant and long-lasting concrete infrastructure, for now and future generations.
